

Atlas Security Review

Prepared by Acme Corp IT Security for the Atlas rollout with Northwind.
Tom Becker leads the review on the Acme side.

Summary: the Atlas assistant processes internal documents and meeting transcripts. Data residency and SSO integration are the main areas of concern.

Findings

1. SSO via Okta is required before the pilot can go live.
2. Meeting transcripts must be retained for no more than 90 days.

Status: conditionally approved, pending the SSO integration.
